

Level 2 — /epos2_fjt_fanout goal fan-out

epos2_bridge / epos2_fjt_fanout · ROS node /epos2_fjt_fanout · config/epos2_fjt_fanout.yaml (staged J0 + J2)
Source-derived · started by epos2_fjt_fanout.launch.py or epos2_arm_epos2_generic.launch.py enable_fanout:=true

Blue: node internals · Gray: ROS interfaces and peers · Amber: unresolved
Solid: ROS communication · Dashed: local call or polled state

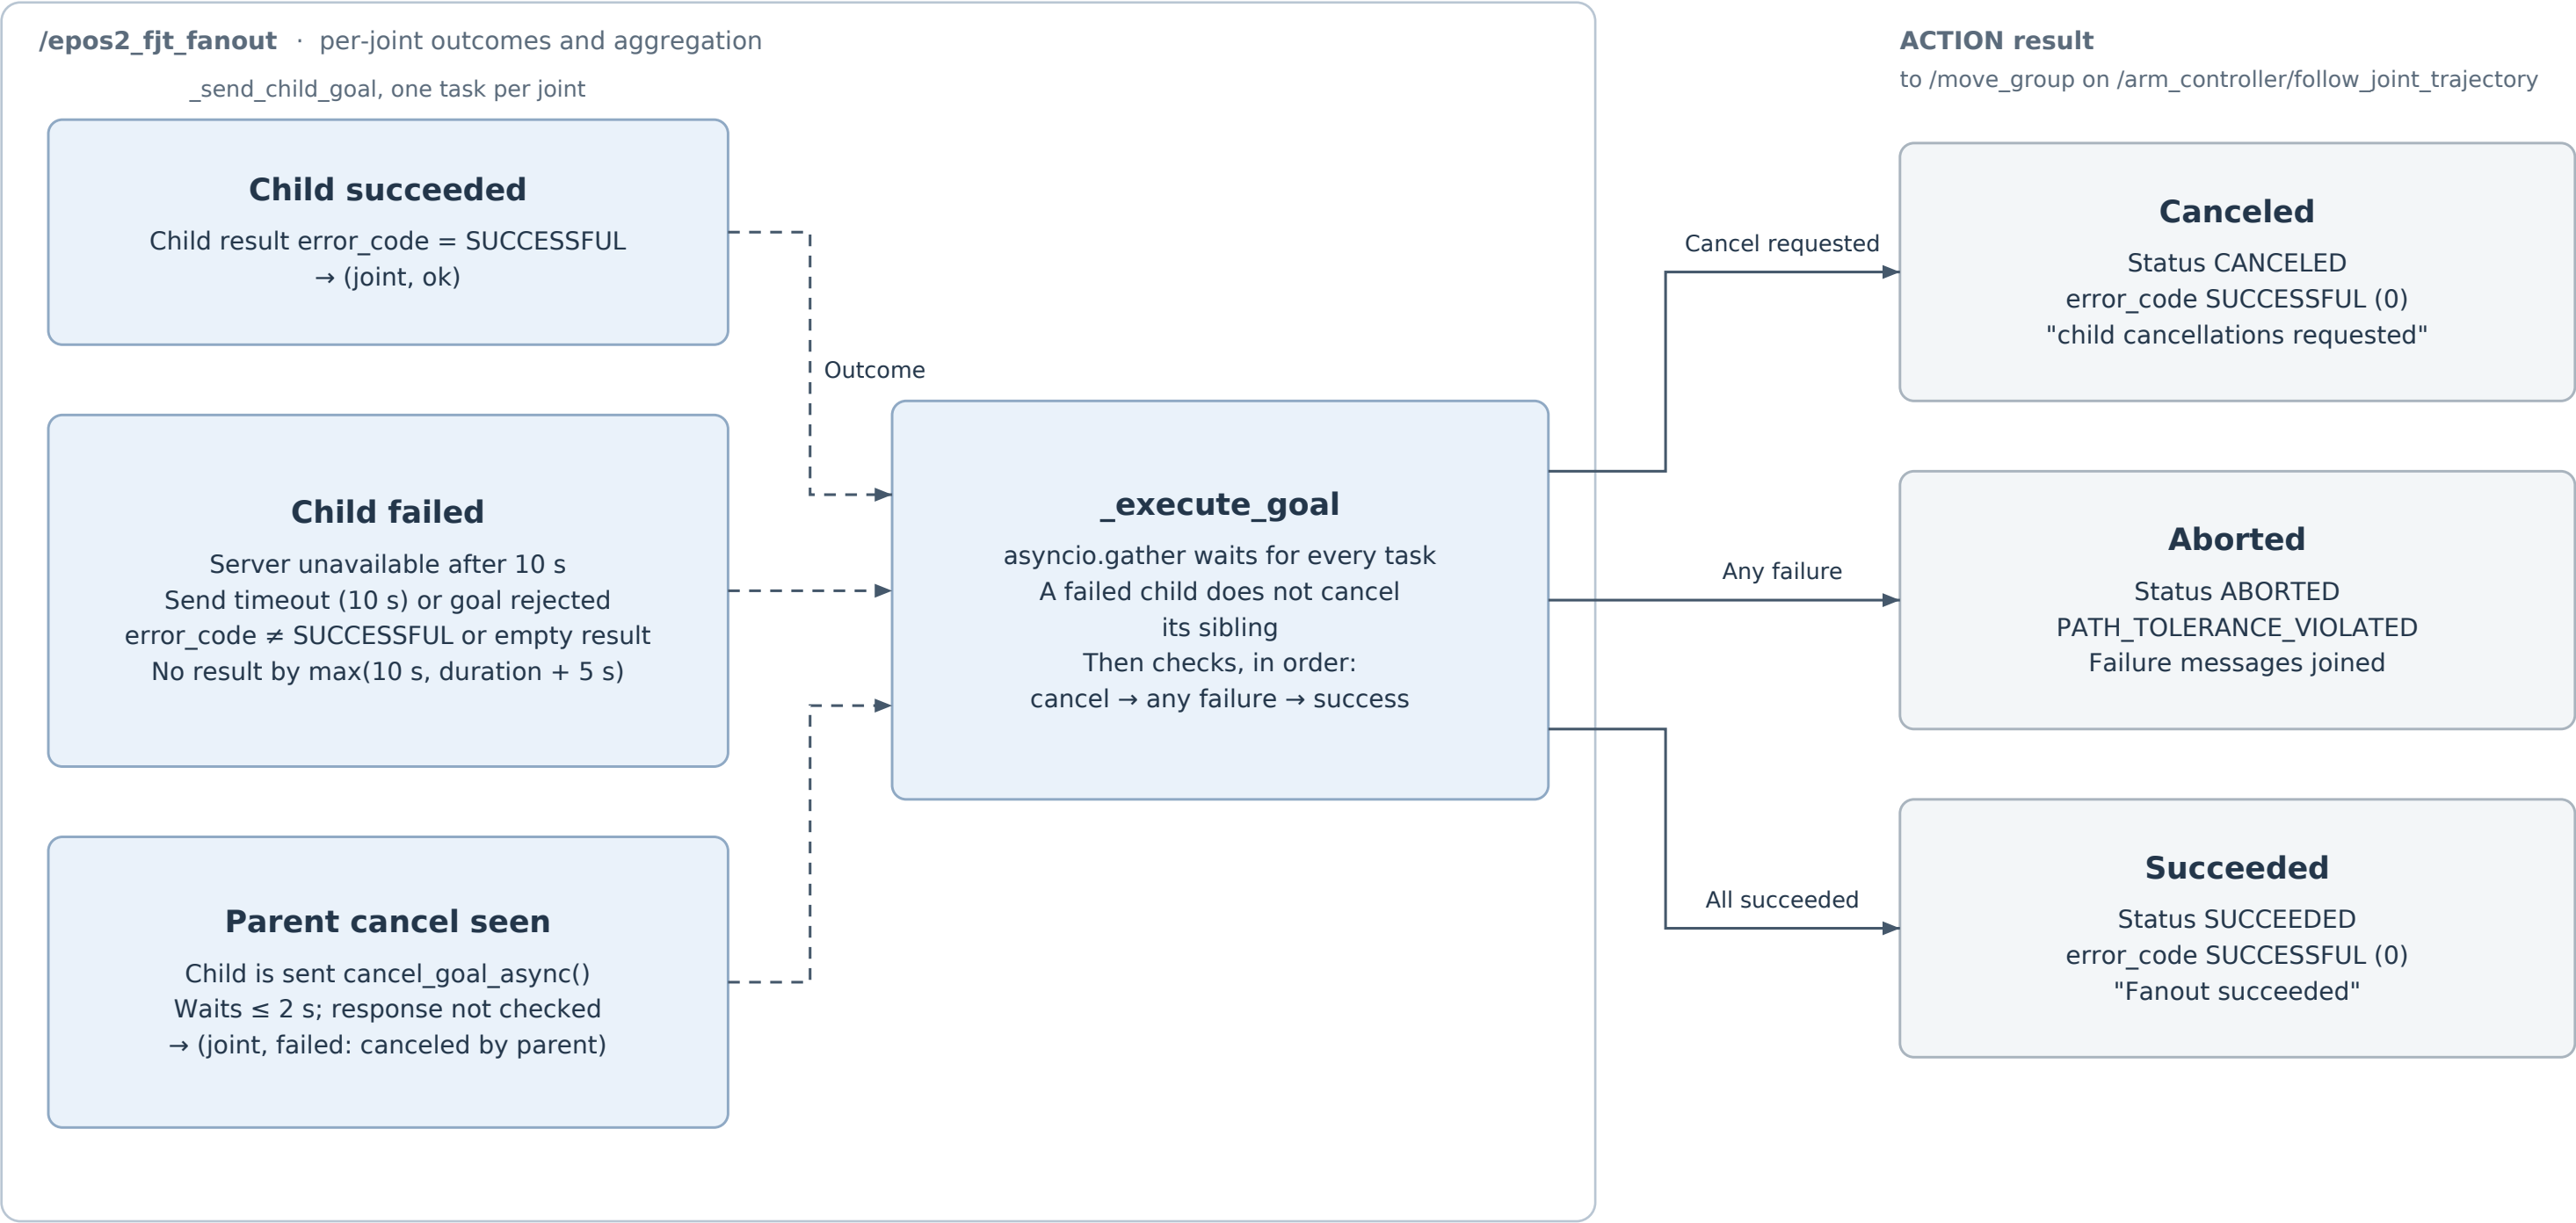

Source evidence

Agrobot/src/epos2_bridge/epos2_bridge/epos2_fjt_fanout.py:61-81 — reentrant group, child clients, action server; 357-367 — MultiThreadedExecutor(num_threads=4).
Same file 103-135 — goal checks (joints, points, extras); 137-138 — cancel always accepted; 140-159 — sync stamp when header.stamp is zero.
Same file 284-325 — missing-joint abort, one task per controlled joint, gather; 161-207 — one-joint child goal; 215-247 — server wait, send, acceptance.
Agrobot/src/epos2_bridge/config/epos2_fjt_fanout.yaml:3-24 — action names, joint0/joint2, flags, timeouts; moveit_config/config/moveit_controllers.yaml:16-31 — arm_controller joint0-joint6.

Level 2 — /epos2_fjt_fanout results and cancellation

epos2_bridge / epos2_fjt_fanout · ROS node /epos2_fjt_fanout · config/epos2_fjt_fanout.yaml (staged J0 + J2)
Completion paths of one parent goal · source-derived

Blue: node internals · Gray: ROS interfaces and peers · Amber: unresolved
Solid: ROS communication · Dashed: local call or polled state

No feedback is published to /move_group; child feedback is not forwarded. Cancellation is requested of children, not confirmed.
Missing controlled joints end earlier with ABORTED / INVALID_GOAL (page 1). Child results are polled every 10 ms.

Source evidence
Agrobot/src/epos2_bridge/epos2_bridge/epos2_fjt_fanout.py:225-245 — server wait, send timeout, rejection; 247-282 — result polling, cancel forwarding (2 s), result timeout.
Same file 325-354 — gather, then cancel → failures → success order; 92-101 — `_await_future` polls every 10 ms with timeout.
Same file (whole) — no `publish_feedback` call; child feedback callbacks are not registered in `send_goal_async` (line 234).
